08 October 2024

## Demand in Private Credit Growing

#### **NEED TO KNOW**

- CEO to repay 11m shares from employee loan share plan at 32% premium to share price. Further 11m shares to be forfeited.
- · Fourth private credit product launched in SMA market.
- PCG has entered into a strategic partnership with one of Australia's largest wealth groups.

Loan share plan positive catalyst: The loan share plan created by PCG involved creating loans for staff to purchase shares at historical share prices. Loans associated with two tranches of shares are due for repayment on 31 Oct 2024. Staff have the option to repay the loan and keep the shares, or forfeit the shares and have the loan cancelled. The board expects the first tranche to be repaid in full at a 32% premium to the current share price, and the second of which is expected to be forfeited, resulting in 11m shares being cancelled and representing an 11% accretion for shareholders.

We see the repayment of shares by staff (CEO) at a 32% premium to current prices as a strong indication of where the underlying value of PCG is, and expect both tranches to have a net benefit for Pengana, with both the \$11m cash inflow and 11m reduction in shares to boost its balance sheet as well as effectively creating value for shareholders.

**Strategic Partnership:** Pengana has entered into its first strategic partnership with one of Australia's largest wealth groups, with its Global Private Credit offering to be recommended as part of the groups allocation to client portfolios.

#### **Investment Thesis**

**Unique Private Credit business only needs one bucket to fire:** We see value in the unique product set that Pengana has created, and we think that with a strong distribution channel, could mean significant sustained inflows.

Cracking the Funds Management Code: PCG's product innovation with its Global Private Credit offering is likely to be transformational for the Group. PCG has created a globally scalable product by utilising its industry knowhow, relationships, but more importantly – understanding a competitive advantage PCG has, including its retail distribution.

By doing so, PCG is able to deliver a multi-pronged product with attractive economics and immediate impact. The likely success here may be a precursor for other product innovation in the Group, marking a new era for the firm (which we do not see as fully appreciated yet, but a big part of the investment opportunity in PCG).

**Upside to performance fees:** Performance fee revenue is now coming off a low base. With PCG expecting its group fee margin to move back to its long-term average, and funds expected to hit high-water marks over the next 12-24 months.

### **Valuation**

We have upgraded our underlying EPS by 8.6%, 15.9%, and 13.4% for FY25, FY26, and FY27 respectively. Our changes are primarily driven by adjusting our share coutn. Based on the changes, we lift our valuation to \$2.03 (previously \$1.96). A summary of our key risks are available on page 7.

## Pengana Private Credit

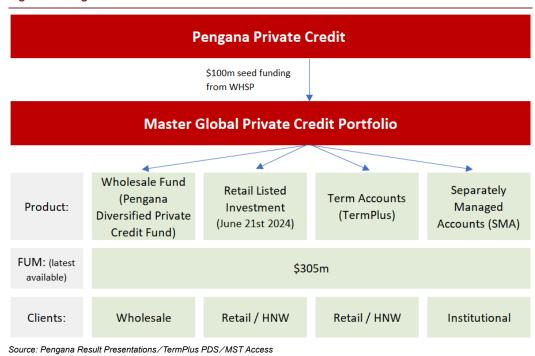

#### **All Four Products Now Live**

Pengana has now launched all four of its flagged private credit products within its Pengana Private Credit business.

The first SMA client has been onboarded and will be using PCG in all its SMA products over time, and we expect an increased amount of inflows to occur over the short to medium term.

PCG began its private credit transformation in April 2023, and flagged that it would create four products over 2024 which it has achieved. All product launches have been successful, its wholesale fund and term accounts are performing in line with expectations, and its retail listed investment vehicle PCX has seen strong demand, with a placement occurring only 3 months after IPO.

Figure 3: Pengana Private Credit Buckets

## Strategic Partnership & Placement

#### **Partnership**

Pengana entered into its first strategic partnership, with one of Australia's largest wealth groups, with an offering specifically tailored for their clients.

This will be the only Global Private Credit offering that will be recommended for allocation in the group's client portfolios and strong inflows are expected over the next few quarters. The selection of Pengana as the preferred Global Private Credit partner for this large group is testament to the attractiveness of the offering.

#### **PCX Placement**

PCX was launched in June 2024, and has had strong performance in its first three months following its IPO. PCG found there was increased demand following the IPO and was able to conduct a placement at a small premium to its NAV.

This is a very positive indicator that its global private credit offering is attractive, especially from a retail perspective where there is limited supply of attractive private credit products in market.

Report prepared by MST Access, a registered business name of MST Financial services ABN 617 475 180 AFSL 500 557.

## Capital Management Changes

### **Breakdown of Employee Loan Share Plans**

Prior to its reverse acquisition with Hunter Hall in 2017, Pengana implemented an employee loan share plan ('LSP'), providing limited recourse loans to staff and contractors to acquire shares in Pengana.

Pengana has been earning a small amount of interest on these loans, however these are now due for repayment by October 31, 2024. There are two tranches of loans to be paid back, differentiated by the implied share price for the loans.

#### Tranche 1

1. Tranche 1 includes \$11m due for repayment, covering 11m shares at an implied share price of \$1.02 per share. This is a 32% premium to last close and the board expects it to be repaid in full, which will result in an \$11m cash inflow for PCG. We now assume this cash inflow.

#### Tranche 2

2. Tranche 2 involves a further \$13m due for repayment covering 11m shares at an implied share price of \$1.21 per share. This is a ~57% premium to last close and the board expects that this tranche will be forfeited, resulting in 11m shares being cancelled.

Figure 4: Employee Loan Share Plan Repayment Indicative Overview

| Tranche 1         | Tranche 2                     |
|-------------------|-------------------------------|
| <b>11</b> m       | 11m                           |

## Valuation

#### **Discounted Cash Flow as at June 2024**

We utilise a DCF Valuation methodology as detailed in the below table.

In our DCF our cost of debt is 4.5%, driven by an assumed 30% tax rate, with our cost of equity at 12.6%. Given PCG is debt-free, our WACC is also 12.6%.

We note that we assume the 11m of shares expected to be issued from the LSP, as well as the \$11m cash inflow.

We value the NPV of future cashflows at \$160m, and include net-cash of \$9m in our below valuation, which helps us arrive at our valuation for Pengana of A\$2.03 per share.

#### **EPS Changes**

We have upgraded our underlying EPS by 8.6%, 15.9%, and 13.4% for FY25, FY26, and FY27 respectively. Our changes are primarily driven by reducing the diluted share count.

Based on the above changes, we lift our valuation to \$2.03 (previously \$1.96).

## **Key Risks**

#### **Strategic**

Pengana Capital Group is subject to a significant number of regulatory requirements, and could suffer from adverse changes to the requirements, including in Australia:

- Anti-money laundering and counter terrorist financing requirements administered by Austrac;
- Privacy requirements administered by the Privacy Commissioner.
- Financial Service licencing and Credit licencing administered by the Australian Securities and Investments Commission (ASIC);
- Australian Consumer Law and unfair contract terms contained in the Corporations Act administered by the Australian Competition and Consumer Commission (ACCC);
- Taxation legislation administered by the Australian Taxation Office (ATO);
- Accounting standards required under the Corporations Act administered by the Australian Accounting Standards Board (AASB) and ASIC.

Pengana Capital Group operates in a competitive environment where performance can vary and new or rival offerings emerge periodically. Sometimes consolidation of fund managers occurs, such as Pengana's own merger with Hunter Hall several years ago. These risks present to investors in the form of both strategic M&A risks and general market risks.

#### **Financial**

Being a fund manager, Pengana Capital Group has a range of risks and sensitivities applicable to most companies in the financial sector. These include:

- Investment performance investors seek out funds with a strong performance history, so fund
  performance tends to be a reasonable indicator of future flows. Furthermore, with many of
  Pengana's funds featuring performance fees, weak investment performance will also impact
  Pengana's performance fee earnings, and hence its profitability.
- Macroeconomic conditions many of the following risks vary through the economic cycle.
  Loose monetary conditions, such as those currently being experienced, supress many of these
  risks which can them emerge suddenly as macroeconomic policy tightens, and conditions
  deteriorate. Economic stimulus to counter COVID-19 has led to a strong market recovery
  following the aggressive market sell-off at the start of the pandemic. Where funds are optimised
  for a particular investment style, macroeconomic conditions can have a significant impact on the
  relative performance of that style compared to other investment styles.
- Compliance risks There are many regulations that companies in the finance sector need to follow, outlined above in strategic risks, including anti-money laundering and counter terrorist financing know your customer requirements, where failure to comply with the regulatory requirements can lead to material financial penalties or litigation.

#### **Operational**

Most companies, including Pengana Capital Group, have a range of operational risks. These include:

- **Governance** Increasingly an investment focus as part of ESG, governance risks include all matters of agency costs within the business, including delegated responsibilities and authorisations, internal controls and how conflicts of interest are addressed.
- Key personnel Pengana Capital Group's ability to scale its business assumes availability of suitably qualified staff and a reliance on key personnel. This is particularly relevant for fund managers, where portfolio managers carry significant key personnel risk. Pengana's house of funds approach, and strong incentive alignment with portfolio managers are examples of the methods employed to manage this risk.
- Information technology Should Pengana Capital Group's key technology infrastructure become corrupted such as from hardware failure or malware it would be highly disruptive to Pengana Capital Group's operations. Furthermore, IT hardware and software becomes obsolete after a few years and requires capital investments to be updated, otherwise the company is at high risk of becoming inefficient and being superseded by its competitors.
