Pengana WHEB Sustainable Impact Fund

VIEWPOINT

The Fund, managed by WHEB Asset Management (WHEB) and distributed by Pengana Capital Group Limited (Pengana), offers investors a sustainably-focused and benchmark-unaware exposure to global equities. WHEB invests in impactful companies which produce goods and services that solve sustainability challenges. Zenith believes the Fund offers an attractive and differentiated exposure and is ultimately well positioned to deliver upon its investment objectives.

WHEB is a specialist investment manager co-founded in 2009 by Ted Franks and Clare Brook. WHEB specialises in the management of a single sustainably-focused global equity strategy. As at 31 October 2022, WHEB managed approximately \$A 2.5 billion firmwide. Zenith has a favourable view of the arrangement between WHEB and Pengana, believing that it pairs a solid investment manager with a distribution partner possessing a strong footprint in the domestic market.

WHEB's London-based investment team of six is led by Franks, who is also responsible for the Fund and has been with WHEB since its inception in 2009. The current iteration of the strategy was initially managed at Henderson and relaunched at WHEB in 2012. Zenith believes the team has the required experience and expertise to manage the strategy.

WHEB's investment philosophy is based on the belief that superior risk-adjusted returns can be generated by investing in companies operating in markets that benefit from and facilitate a shift to a more sustainable economy. The Fund is expected to have exposure to the following long-term trends: resource efficiency, environmental services, water management, health, well-being, cleaner energy, sustainable transport, safety and education. Zenith believes WHEB's investment process is strongly aligned with its differentiated investment philosophy.

WHEB's fundamental analysis process focuses on a company's market attractiveness, competitive position, value-chain analysis, growth strategy, quality of management and approach to environmental, social and governance factors. Additionally, WHEB conducts impact analysis that seeks to quantify the different dimensions of a company's positive impact. Overall, Zenith believes the security selection process is less structured relative to peers and requires significant reliance on the investment team's judgement and skill.

To determine position sizing, Franks considers the conviction of the investment team's stock ideas and liquidity. The Fund is expected to maintain a heavy bias towards the healthcare and industrials sectors, with generally limited or no exposure to the financials and energy sectors. Zenith believes WHEB's portfolio construction process ensures that the team's best investment ideas are held in the Fund.

WHEB was appointed as the investment manager of the Fund in August 2017. The track record prior to this date is attributable to another investment manager that employed a different strategy.

FUND FACTS

- Expected to hold between 40 and 60 stocks
- Mid capitalisation bias
- Portfolio turnover is expected to be approximately 20% p.a.
- Zenith has assigned the Fund a responsible investment classification of **Impact**

APPLICATIONS OF INVESTMENT

SECTOR CHARACTERISTICS

International equities offer Australian investors the ability to access a broader opportunity set, with the potential to invest in sectors not represented or not well represented in the Australian market. Given international markets are not perfectly correlated with the Australian market, international equities also afford portfolio diversification benefits.

The Zenith 'International Shares - Global (Unhedged)' sector consists of long-only funds that invest in global equity markets. The sector incorporates both benchmark-aware and benchmark-unaware strategies that focus predominantly on larger capitalisation stocks. The sector is one of the most competitive fields in the investment landscape, based on the number of managers and strategies available to investors.

Zenith benchmarks all funds in this sector against the MSCI World ex-Australia Index (Unhedged), which corresponds with the benchmark employed by most funds in the sector. The index is market-capitalisation weighted, resulting in those companies with the largest market capitalisations receiving the heaviest weighting. The index consists of approximately 1,454 securities listed in 22 developed markets (Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States) with the United States currently representing approximately 71% of the index; Japan and the United Kingdom being the next largest constituents, with approximately 6% and 4%, respectively. Although the index excludes emerging and frontier markets, many funds retain the mandate flexibility to invest in emerging markets.

The global share market, as represented by the MSCI World ex-Australia Index, is far more diverse in terms of sector and stock exposures than the Australian market. Many sectors not well represented in the Australian market, such as information technology and communication services, are well represented in the global index, with approximate weights of 21% and 11%, respectively. In addition, the largest 10 stocks represent approximately 19% of the global index, reflecting the greater breadth and less top-heavy nature of the global universe.

The Unhedged classification indicates that funds in this universe are currency unhedged, resulting in their returns being broadly affected by fluctuations in the Australian Dollar (AUD) versus other global currencies. Returns of unhedged funds are positively impacted by a depreciating AUD, whilst an appreciating AUD will negatively impact returns.

PORTFOLIO APPLICATIONS

International equities provide investors with broad exposure to industries and countries. With such a broad universe, it is expected that managers can deliver superior returns to more conservative asset classes. However, the expectation of greater returns comes with increased volatility, especially when currency movements are considered. Therefore, it is recommended that investors adopt a longer time frame when investing in international equities. It is also recommended that investments in international equities are blended with domestic equities and other asset classes such as fixed income to improve portfolio diversification.

The Fund is constructed in a benchmark-unaware manner, and as such, investors should be aware that the Fund's returns may vary considerably from the benchmark and peers.

Due to the Fund's responsible investment focus, Zenith believes it will typically exhibit a growth bias. As such, Zenith believes that it should be blended with other style-neutral and/or value-orientated international equities products to achieve a more diversified exposure to the sector. In addition, given that the Fund is expected to have meaningful exposure to mid-cap companies, Zenith believes the Fund would blend well with larger capitalisation international equities products.

WHEB's consideration of sustainability factors may appeal to investors seeking a more socially responsible international shares offering. Zenith notes that the sustainable/ethical sector comprises a number of funds that range in their interpretation of screening (both negative and positive) and their assessment of socially-responsible investment issues. Zenith believes investors should familiarise themselves with a manager's responsible investment policy before investing.

The Fund's currency exposure remains unhedged, which will suit investors looking for an international equity investment with exposure to fluctuations in the Australian dollar. For investors who are concerned about the short-term risks associated with fully unhedged or hedged currency positions, Zenith suggests blending hedged and unhedged global equity exposures to reduce short-term volatility.

The Fund's portfolio turnover is expected to be approximately 20% p.a., which Zenith considers to be low. WHEB has indicated that approximately 50% of the expected turnover is attributed to resizing existing positions and approximately 50% is due to complete sales and new additions. Given this expected level of turnover, the majority of the Fund's returns are expected to be delivered via a capital appreciation in the unit price, rather than through the realisation of capital gains in income distributions. In addition, realised capital gains are highly likely to be eligible for the capital gains tax discount. As such, holding all else equal, the Fund may be more appealing to investors who are high marginal tax rate payers as it will result in superior after-tax return outcomes.

RISKS OF THE INVESTMENT

SECTOR RISKS

The broad risks of investing in global equities include:

MARKET DOWNTURN: The biggest risk for all global equities based products is a significant downturn across global equities markets, which could lead to periods of negative performance. This risk can be significantly reduced by investors adopting a medium to long-term (7+ years) investment time frame.

AUSTRALIAN DOLLAR (AUD) CURRENCY RISK: The AUD has historically experienced declines during weaker market environments, and appreciation in market upturns. For funds that maintain an unhedged currency exposure, an appreciating AUD is likely to have a negative impact on a fund's total return. Conversely, an unhedged fund is likely to benefit relative to hedged global equities funds in periods where the AUD depreciates. Zenith believes that over the long-term, the currency impact on performance will be minimal and therefore does not advocate retail investors making active currency

decisions based on near-term currency predictions. For investors who are concerned about the short-term risks associated with taking fully unhedged or hedged currency positions, Zenith suggests blending hedged and unhedged global equity exposures to reduce short-term volatility.

REGULATORY RISK: The ASIC Regulatory Guide 97 'Disclosing Fees and Costs in Product Disclosure Statements and Periodic Statements' came into effect on 1 October 2017 and seeks to establish a common framework for disclosing fees with respect to registered managed investment schemes issued to retail investors.

In November 2019, ASIC released its final recommendations, with proposed changes phased in from 30 September 2020, with all Funds required to be compliant by 30 September 2022.

In its current form, RG97 will not impact the actual costs (or after fee returns) on existing investments. Rather, the guide is focused on providing increased transparency with respect to the costs of management. Given this, it is feasible that under RG97, investors become more sensitive to the costs charged and seek lower cost alternatives, potentially leading to fund outflows.

FUND RISKS

Zenith has identified the following key risks of the Fund. Although Zenith believes the risks noted are all significant, we have listed them in order of importance. In addition, we have not intended to highlight all possible risks

KEY PERSON RISK: Zenith believes the departure of Ted Franks would be viewed as a material loss and would trigger a review of the Fund's rating. However, Zenith believes the current equity ownership arrangement mitigates this risk, at least in the medium term.

RELATIVE PERFORMANCE RISK: Investors should be aware that the differentiated and benchmark-unaware investment process may lead to performance outcomes that significantly deviate from that of the benchmark and peers. In addition, the Fund's growth style may result in underperformance during certain periods throughout a market cycle.

CAPACITY/LIQUIDITY RISK: Excessive levels of funds under management (FUM) can inhibit a manager's ability to trade portfolio positions effectively, thereby limiting outperformance potential. As at 31 October 2022, approximately \$A 2.5 billion was invested in the Fund's strategy.

In February 2022, WHEB revised its capacity limit for the strategy from \$US 3 billion to \$US 8 billion. Although Zenith does not believe the Fund is currently impacted by capacity limitations, we will continue to monitor the underlying strategy's liquidity and returns closely to ensure that increasing levels of FUM do not begin to negatively impact performance.

QUALITATIVE DUE DILIGENCE

ORGANISATION

WHEB Asset Management (WHEB) is a specialist investment manager co-founded in 2009 by Ted Franks and Clare Brook. WHEB is privately owned, with Franks, Seb Beloe, George Latham and Geoff Hall holding a combined 40% of the firm, with the remainder held by WHEB Group. Headquartered in London, WHEB Group is an investment holding company

specialising in sustainable investment management on behalf of institutional and private clients. The firm operates through its sole subsidiary WHEB.

Zenith notes that the investment team holds a minority stake in the partnership, which we believe is sub-optimal. Zenith prefers investment staff to be in a position to dictate the direction of the business, without potential pressure from other equity holders. However, Zenith acknowledges that the investment team has the ability to materially increase its equity stake in WHEB should certain targets be met. This was previously illustrated in 2019, when the investment team collectively increased its equity stake from 20% to 40%, giving Zenith a greater level of comfort.

As at 31 October 2022, WHEB managed approximately \$A 1.4 billion firmwide. Zenith has been comforted by WHEB's consistent growth in funds under management (FUM), which we believe has materially reduced business risk.

The Fund is offered by Pengana Capital Limited (Pengana). Pengana is an Australian funds management boutique founded in 2003. Pengana is headquartered in Sydney, with offices in Melbourne, Perth and Brisbane. Pengana's goal is to find and support experienced fund managers with long track records. Pengana provides staff and support for its fund managers, leaving the investment staff entirely responsible for the management and performance of its funds.

In June 2017, Pengana completed a merger with Hunter Hall International Limited (ASX:HHL). As a result, HHL was renamed Pengana Capital Group Limited (ASX:PCG). The combined entity offers a diversified range of equity-based strategies totalling \$A 3.3 billion in FUM as at 31 October 2022.

Zenith has a favourable view of the arrangement between WHEB and Pengana, believing that it pairs a solid investment manager with a distribution partner possessing a strong footprint in the domestic market.

As at 31 October 2022, WHEB had FUM of approximately \$A 1.4 billion in its Global Sustainable strategy, of which approximately \$A 251 million was invested in the Fund.

INVESTMENT PERSONNEL

Name	Title	Tenure
Ted Franks	Portfolio Manager	13 Yr(s)

WHEB's London-based investment team of six is led by Ted Franks, who is also responsible for the Fund and has been with WHEB since its inception in 2009. The current iteration of the strategy was initially managed at Henderson and relaunched at WHEB in 2012. Zenith believes the team has the required experience and expertise to manage the strategy.

Franks has over 17 years of investment experience and prior to WHEB, he worked as an analyst covering renewable energy and utilities sectors at Dresdner Kleinwort and KPMG. Zenith considers Franks to be an experienced and capable portfolio manager with the required skill set to manage the strategy.

Franks is supported by Seb Beloe, Ty Lee, Ben Kluffinger, Claire Jervis and Victoria MacLean. Jervis and MacLean joined the investment team in 2021. Zenith believes the investment team's expansion is likely to improve the depth and breadth of

WHEB's investment research.

All members of the investment team provide analytical and research coverage of stocks. Team members are given the freedom and flexibility to cover stocks in any sector or region, rather than dividing research responsibilities amongst traditional sector or regional lines. Each stock in the portfolio and watchlist is assigned a primary analyst and responsibilities are rotated approximately every 18 months, as WHEB believes this enhances the diversity of perspectives.

The investment team's remuneration structure consists of a base salary, participation in the deferred equity scheme and a discretionary cash-based bonus on an individual's contribution to portfolio outcomes, as well as overall business success. In lieu of a cash-based bonus, Franks receives rewards associated with equity ownership. Zenith believes that WHEB's remuneration structure provides sufficient alignment of interests between employees and investors.

Overall, Zenith believes the investment team has the required experience and expertise to manage the strategy.

INVESTMENT OBJECTIVE, PHILOSOPHY AND PROCESS

The Fund's objective is to achieve capital growth over the medium to longer term, by investing in impactful companies which produce goods and services that solve sustainability challenges. Internally, the Fund aims to outperform the MSCI World \$A Index by 3% p.a. (before fees).

WHEB's investment philosophy is based on the belief that superior risk-adjusted returns can be generated by investing in companies that are:

- Operating in sectors and markets that benefit from and facilitate a shift to a more sustainable economy
- Well-managed, with strong fundamental performance and robust environmental, social and governance (ESG) practices
- Attractively valued

Specifically, the Fund is expected to have exposure to the following long-term environmental and social trends:

- Resource efficiency
- Environmental services
- Water management
- Health
- Well-being
- Cleaner energy
- Sustainable transport
- Safety
- Education

Zenith notes that consistent with most socially responsible investing/sustainability-focused strategies, the Fund is expected to exhibit a mid-capitalisation bias

The Fund transitioned to the current investment strategy in August 2017. However, Zenith notes that the strategy has a long-term track record dating back to 2006.

Overall, Zenith believes WHEB's investment process is logical and differentiated.

SECURITY SELECTION

WHEB's initial investment universe includes all global listed equities on developed market exchanges. WHEB implements a series of filters to identify companies that have at least 50% of their revenue or profit derived from at least one of the following areas:

- Resource efficiency
- Environmental services
- Water management
- Health
- Well-being
- Cleaner energy
- Sustainable transport
- Safety
- Education

Zenith notes that in September 2022, the minimum market capitalisation of investable companies was increased from \$US 200 million to \$US 2 billion. As a result, the investment universe decreased from 1000 to 500 companies. Whilst Zenith acknowledges that historically WHEB has avoided investing in securities with a market capitalisation of less than \$US 2 billion, we will continue to monitor the Fund's average weighted market capitalisation.

The most significant source of idea generation is research, company visits and industry contacts. The team also conducts in-depth research on thematic trends in order to identify investment opportunities. Examples of these sub-themes include Chinese wind farms, Japanese industrial automation and healthcare information technology.

The investment universe is filtered using a range of financial metrics, including:

- Revenue growth
- Profitability growth
- Earnings before interest, tax, depreciation and amortisation margin
- Return on invested capital

The idea generation phase identifies approximately 40 to 60 stocks per year. The team then conducts a detailed fundamental analysis, focusing on a company's competitive position, value-chain analysis, growth strategy, quality of management and approach to ESG factors.

Additionally, WHEB conducts an impact analysis that seeks to quantify the different dimensions of a company's positive impact. The impact engine considers the following:

- Importance of Outcomes
 - How vulnerable is the beneficiary?
 - How critical is the outcome to the beneficiary?
- Change in Outcomes
 - How large is the impact compared to the baseline?
 - How widely applicable is the product?
- Contribution to Outcomes
 - How central is the product's impact on the outcome?
 - How unique is the product's contribution?

WHEB must deem a company's products or services to

generate a positive impact on society for it to be considered for further fundamental research.

Analysts have discretion over the valuation techniques used. The most commonly employed techniques are listed below:

- Enterprise value/EBITDA
- Price to earnings (P/E)
- Price/earnings to growth (PEG)
- Cashflow yield

Whilst the flexibility in valuation techniques may generate inconsistencies in certain cases, Zenith believes that WHEB's investment team possess the requisite experience and undertake an appropriate level of peer review to value companies.

Following the fundamental analysis and valuation process, analysts assign a rating to each stock on a scale of 0 to 100. A score of 100 indicates a strong positive view while 0 indicates a strong negative view.

Zenith notes that the security selection process allows the team to source investment opportunities across a range of long-term thematic trends. However, Zenith believes the process is less structured and robust relative to peers, relying heavily on the investment skill and experience of senior team members.

PORTFOLIO CONSTRUCTION

Franks is responsible for portfolio construction and strongly leverages the output of the stock selection process. Existing positions in the Fund are continuously reassessed relative to potential new additions based on upside potential.

The Fund is expected to hold between 40 and 60 stocks. To determine position sizing, Franks considers the conviction of the investment team's stock ideas and liquidity. Conviction is measured in three levels:

- A - Highest conviction stocks, typically 2.9% weight
- B - High conviction stocks, typically 2.2% weight
- C - Medium conviction stocks, typically 1.5% weight

Individual stock positions are subject to a hard limit of 5%.

The Fund is unconstrained at a sector level, while regional allocations are expected to be broadly in line with those of the benchmark. In addition, no more than 30% of the Fund may be invested in any of the key thematics (resource efficiency, environmental services, water management, health, well-being, cleaner energy, sustainable transport, safety and education).

The Fund is expected to maintain a heavy bias towards the healthcare and industrials sectors, with generally limited or no exposure to the financials and energy sectors. In addition, the Fund generally exhibits a mid-market capitalisation bias.

A stock will be sold due to the following reasons:

- A material change in the investment thesis
- Reduced conviction in management
- Better opportunities are identified

Zenith notes that WHEB may occasionally hold securities that are deemed to have exceeded their intrinsic value if they continue to rank well relative to the rest of the universe. As such, Zenith believes WHEB's valuation discipline is less

robust compared to peers.

Portfolio turnover is expected to be approximately 20% p.a., which Zenith considers to be low.

The Fund is generally fully invested, with cash typically less than 5%. Zenith believes that active managers should remain fully invested and cash holdings kept to a minimum.

Overall, Zenith believes WHEB's portfolio construction process ensures that the team's best investment ideas are held in the Fund.

RISK MANAGEMENT

Portfolio Constraints	Description
Security Numbers	40 to 60
Single Theme Exposure (%)	max: 30%
Cash (%)	max: 5%
Active Security Weight (%)	max: 5%
Active Regional Weight (%)	-3% to +3%
ESG Constraints - Excluded Sectors	N/A

The Fund's risk constraints are listed in the table above.

At the stock selection stage, the detailed level of research undertaken serves to manage stock-specific risk. The collective peer review process also ensures that a wide range of issues are addressed and debated prior to any stock selection decision. This process ensures that only quality stocks in which the investment team have a high level of conviction are considered for investment. Zenith believes the research approach undertaken by WHEB assists analysts in understanding the risks associated with each security.

WHEB's Investment and Risk Committee (IRC) is responsible for the overall risk management of the Fund. The IRC comprises George Latham and Jayne Sutcliffe and conducts regular reviews of the following:

- Portfolio exposures - stock, sector, theme and sub-theme
- Concentration
- Liquidity
- Performance attribution

The IRC also reviews the Fund's operational risk and compliance issues.

Whilst Zenith is comfortable with the Fund's risk management process, investors should be aware that there is a significant reliance on the judgement and skill of WHEB's investment team in managing investment risk.

Responsible Investment Approach

WHEB has an established Responsible Investment Approach, last updated in 2021, that guides its investment decisions. In addition, WHEB is a signatory of the United Nations-supported Principles for Responsible Investing (PRI).

Whilst the Fund has no formal environmental, social and governance (ESG) constraints, WHEB takes an active approach to ESG issues.

WHEB seeks to invest in companies operating in sectors and

markets that benefit from and facilitate a shift to a more sustainable economy. Furthermore, WHEB's impact analysis ensures that only companies it deems to be generating products that have a positive impact on society are included in the Fund.

Zenith believes that this qualitative analysis of a company's operations is crucial on a forward basis, given that a company's performance with regard to ESG considerations is increasingly being reflected in its share price. Zenith believes WHEB's ESG analysis is comprehensive.

From a classification scale of:

- Impact
- Thematic
- Integrated
- Aware
- Traditional

Zenith has assigned the Fund a responsible investment classification of **Impact**.

INVESTMENT FEES

The sector average management cost (in the table below) is based on the average management cost of all flagship International Shares - Global (Unhedged) funds surveyed by Zenith.

A management cost of 1.35% p.a. applies to this Fund, with no associated performance fee.

Overall, Zenith believes the Fund's fee structure is expensive, relative to peers, given its stated objectives. In addition, we believe that investors have not been sufficiently compensated by way of risk-adjusted performance given the fees paid over the past three years (ending 30 June 2022).

There is also a buy/sell spread of 0.25% charged on Fund entry and exit.

(The fees mentioned above are reflective of the flagship version only and may differ when the product is accessed through an alternate investment vehicle such as a platform.)

Fees Type	Fund	Sector Average (Wholesale Funds)
Management Cost	1.35% p.a.	0.87% p.a.
Description		
Performance Fee	N/A	
Buy Spread		
Buy / Sell Spread	0.25%	0.25%

Minimum and Maximum Returns (% p.a.)

Investors should note that the Fund has been managed by WHEB since August 2017. As such the Fund's performance prior to this date should not be considered when assessing WHEB's performance as the investment manager.

All commentary below is as at 31 October 2022.

The Fund's objective is to achieve capital growth over the medium to longer term by investing in impactful companies which produce goods and services that solve sustainability challenges. Internally, the Fund aims to outperform the MSCI World \$A Index by 3% p.a. (before fees).

WHEB has been unable to meet this objective over the most recent three-year period.

The Fund's volatility (as measured by Standard Deviation) has been higher than peers and the benchmark over the most recent three-year period.

RELATIVE PERFORMANCE ANALYSIS

Information Ratio	-0.43	-0.67	-0.58	-1.55

All commentary below is as at 31 October 2022.

Zenith seeks to identify funds that outperform in over 50% of months in all market conditions, as we believe this represents the consistency of manager skill. The Fund has not met this outcome since WHEB took over as its investment manager.

DRAWDOWN ANALYSIS

Drawdown analysis assesses the relative riskiness of a Fund versus the benchmark, in reference to capital preservation. The maximum Drawdown is recorded as the percentage decline in the value of a portfolio from peak to trough (before a new peak is achieved). All Drawdown analysis is calculated commencing from the inception date of the Fund in question, and Drawdown analysis for the Fund and benchmark(s) are calculated independently. That is, the largest drawdown for the Fund and benchmark(s) will not always refer to the same time period.

Drawdown Analysis	Fund	Benchmark
Max Drawdown (%)	-27.05	-34.20
Months in Max Drawdown	32	16
Months to Recover	17	52

Worst Drawdowns	Fund	Benchmark
1	-27.05	-34.20
2	-26.58	-16.13
3	-25.10	-12.79
4	-18.78	-11.10
5	-14.30	-9.86

All commentary below is as at 31 October 2022.

Since WHEB was appointed as the Fund's investment manager, the Fund has generally experienced drawdowns similar to the benchmark. However, Zenith notes that the Fund's most recent drawdown has been materially larger than the benchmark.

Zenith notes that this is consistent with WHEB's growth-biased investment approach and the Fund's mid-cap bias.

INCOME/GROWTH ANALYSIS

Income / Growth Returns	Income	Growth	Total

FY to 30 Jun 2016	5.67%	-14.60%	-8.93%
FY to 30 Jun 2015	0.41%	9.92%	10.33%
FY to 30 Jun 2014	0.00%	18.33%	18.33%

Investors should be aware that WHEB does not target a specific level of income returns, with distributions made annually where possible. Zenith would prefer a more frequent distribution profile to alleviate potential issues involved with large distributions at 30 June.

The Fund's portfolio turnover is expected to be approximately 20% p.a., which Zenith considers to be low. WHEB has indicated that approximately 50% of the expected turnover is attributed to resizing existing positions and approximately 50% is due to complete sales and new additions. Given this expected level of turnover, the majority of the Fund's returns are expected to be delivered via a capital appreciation in the unit price, rather than through the realisation of capital gains in income distributions. In addition, realised capital gains are highly likely to be eligible for the capital gains tax discount. As such, holding all else equal, the Fund may be more appealing to investors who are high marginal tax rate payers as it will result in superior after-tax return outcomes.

REPORT CERTIFICATION

Date of issue: 30 Nov 2022

Role	Analyst	Title
Author	Atharv Seth	Associate Investment Analyst
Sector Lead	Quan Nguyen	Head of Equities
Authoriser	Bronwen Moncrieff	Head of Research

ASSOCIATIONS & RELATIONSHIPS

ASIC Regulatory Guide RG79.164 requires Research Houses to disclose certain associations or relationships that they may have with a product issuer. We may receive remuneration from an issuer or investment manager for subscription to our other research/ data services or the research/ data services of our related entities. Conflict management arrangements are in place where we or our related entities provide research services to the product issuer or financial advisory businesses who provide financial planning services to investors and are also associated entities of product issuers. This is in accordance with the Zenith Group's Conflict of Interests Policy. Further details in relation to our relationships and associations are available on request.

*In March 2021, Zenith implemented a new ratings methodology for products classified as Traditional Index. Any rating issued from this date forward for Traditional Index products only reflect this change in methodology, with the relevant Traditional Index ratings being Index Approved, Index Recommended and Index Highly Recommended. Ratings issued for Traditional Index products prior to March 2021 are retained for historical purposes in line with our regulatory requirements and were issued in line with Zenith's Fund Research Methodology. Further information in relation to Zenith's Traditional Index Research Methodology and Traditional Index Ratings can be found on the Zenith website.

DISCLAIMER AND DISCLOSURE

Zenith Investment Partners (ABN 27 103 132 672) is the holder of Australian Financial Services Licence 226872 and is authorised to provide general financial product advice. This Product Assessment Report (report) has been prepared by Zenith exclusively for Zenith clients and should not be relied on by any other person. Any advice or rating contained in this report is limited to General Advice for Wholesale clients only, based solely on the assessment of the investment merits of the financial product. This report is current as at the date of issue until it is updated, replaced or withdrawn and is subject to change at any time without notice in line with Zenith's regulatory guidelines. Zenith clients are advised to check the currency of reports and ratings via Zenith's website for updates and should also verify information in relation to the fund with the relevant Fund Manager. Any advice contained in this report has been prepared without taking into account the objectives, financial situation or needs of any specific person who may read it, including target markets of financial products, where applicable. It is not a specific recommendation to purchase, sell or hold the relevant product(s). Investors should seek their own independent financial or tax advice, obtain a copy of, and consider any relevant PDS or offer document and consider the appropriateness of this advice in light of their own objectives prior to making any investment decision. Zenith charges an upfront flat fee to the Product Issuer, Fund Manager or other related party to produce research on funds that conform to Zenith's Research Methodology. Zenith's fee and Analyst remuneration are not linked to the rating outcome in any way. Views expressed in Zenith reports accurately reflect the personal, professional, reasonable opinion of the Analyst who has prepared the report. Zenith may also receive a fee for other non-research related services such as subscription fees for Zenith's research services and/or for the provision of investment consultancy services. Conflicts management arrangements are in place where Zenith provides research services to financial advisory businesses who provide financial planning services to investors and are also associated entities of the product issuers, with any such conflicts of interest disclosed within reports as appropriate. Full details regarding such arrangements are outlined in Zenith's Conflicts of Interest Policy www.zenithpartners.com.au/important-information/links/conflicts-of-interest/

Zenith's research process seeks to identify investment managers considered to be the 'best of breed' through a comprehensive, multi-dimensional selection process. Zenith utilises both quantitative and qualitative factors in its ratings models. Models maximise commonality across different asset classes while retaining flexibility for specialist asset classes and strategies. The selection process is rigorous in both its qualitative and quantitative analysis and each component is equally weighted. Zenith does not manage any proprietary assets and as such Zenith is able to choose investment managers with absolute independence and objectivity. More detailed information regarding Zenith's fund research methodology and Zenith's traditional index research methodology, coverage and ratings is available on Zenith's website at [Fund Research Methodology](#) and [Traditional Index Research Methodology](#).
